

Communication parameters for OFTP2 engineering data exchange

Status: 26 September 2025

Contact Data Exchange Department

E-Mail: 07wwfm.DataExchange@aumovio.com

Phone: Mr. Markus Oklitz Tel.: +49-6196-87-3158
Mr. Bernhard Geier Tel.: +49-841-881-2736

Department: A IT EA SWT B2X

Address: Aumovio SE
Guerickestr. 7
D-60488 Frankfurt am Main
Germany

Alternative Communication Types

Besides OFTP2 we also offer a [Web Portal](#) for data exchange:

The web portal offers up- and download with personal user name and password. Please contact us for accounts.

Supported Locations

We support all former Continental Automotive locations all around the world.

This includes, among others, locations of the companies (formerly) known as ContiTemic, ContiTeves, Siemens VDO, Temic, ADC, TAEM, Teves, Motorola Automotive, AP, Elektrobit etc.

We do not support former ContiTech and ContiTire locations.

ENGDAT Conventions

For OFTP2, file names must be ENGDAT conform.

You must specify the receiver in the ENGDAT header either by email address (**preferred**) or by routing address. People usually know their routing address, but you may also ask us.

You may send any file in any format and size.

When sending CAD data, please send only one model per ENGDAT package. If the CAD model consists of multiple files (assembly), send it as a **tar** or **zip** archive.

OFTP2/TLS Parameters

We are sending from: oftp2-out.aumovio.com
 IPv4: 193.29.3.153
 We are receiving on: oftp2-in.aumovio.com Port 6619
 IPv4: 192.109.198.52
 Odette ID: 00013010204CAXSEDX1
 Password: CAXSEDX1

Default Settings

OFTP2 session security:	OFTP authentication:	no
	Min. protocol version:	2.0
OFTP2 file security:	Encryption:	no
	Compression:	no
	Signature:	no
	Signed EERP:	no

Please talk to us for connection setup!

Partner certificates and/or signed/encrypted files are supported if requested.

Our Certificate

Signature algorithm: SHA-512
